PROFILE SUMMARY

I am an Artificial Intelligence student with a strong interest in learning how smart technologies work and how they can solve real-life problems. I enjoy exploring topics like machine learning, data analysis, and basic programming through my coursework and academic projects. I am a sincere, hardworking, and curious learner who is always ready to gain new knowledge and improve my skills. I like working on practical tasks that help me understand concepts better.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering (Artificial Intelligence)
G H Raison College of Engineering and Management, Pune **2023-2027**
CGPA: 7.94(Sem-5)

- Developed a beginner-friendly task management application to create, view, update, and delete.
- Applied basic SQL queries (INSERT, SELECT, UPDATE, DELETE) for data handling and persistence.
- Used Python programming and basic OOP concepts to manage task operations and logic.
- Generated simple task progress summaries to track completed and pending tasks.

ACADEMIC PROJECTS

Hospital Management System

Developed a web-based application to manage hospital operations including patient registration, doctor appointments, billing, and medical records. Implemented CRUD operations, user authentication, and database integration for efficient healthcare data management.

Online Voting System

Developed a web-based application that allows users to securely cast and manage votes online. Implemented features like user authentication, vote casting, and result display to ensure transparency and efficiency. Focused on enhancing accessibility and reducing manual voting errors.

SKILL

- | | |
|---------------------------------------|--------------|
| • Programming Languages: Python, Java | • OOP Basics |
| • Technologies: HTML, CSS | • Python |
| • Database: MySQL | • SQL |
| | • DSA Basics |
